# 44T-GR8 PROJECT 2

Overview

Group members: Alex Griffin, Nick Bukaty, Thomas Doty, David Cuellar, and Matthew Kravitz

We used Java as our platform, and used JFrame to generate it.

Division of Labor

Alex: Backend, normal and multi-day functionality

Thomas: Created the graphical user interface for adding events

David: Early iterations of event class

Matt: Created the GUI for adding events

Nick: Backend, recurring events functionality

Challenges

Adapting to a new format to add various kinds of events

Switching to serialization instead of text files for event storage

Working with JFrame to create the GUI

Excluded Features

Color coding for type of event

Functionality outside of the school year

Clean up of the code base

What we would do different

Planned more extensively in the meetings and stick to that plan

Splitting up the labor better

Use only one tab for all the events

Make it look nicer (Bigger font, color)
